EDUCATION

- | | | |
|--|---------------------|-----------------------|
| The University of Chicago | Chicago, IL | 2013 - present |
| Postdoctoral fellow, Department of Chemistry and The James Franck Institute | | |
| Northwestern University | Evanston, IL | 2007 - 2012 |
| Ph.D., Physical Chemistry
Dissertation: "Charge-Transfer Oligomers and Polymers for Organic Photovoltaics: Structure, dynamics, and their implications for solar devices" | | |
| University of Washington | Seattle, WA | 2002 - 2007 |
| BS, Chemistry and BA, English (with honors) | | |

RESEARCH EXPERIENCE

- | | | |
|---|---------------------|-----------------------|
| The University of Chicago | Chicago, IL | 2013 - present |
| Postdoctoral fellow, Department of Chemistry and The James Franck Institute
Advisor: Greg S. Engel | | |
| <ul style="list-style-type: none">• Built an experiment to measure the time-resolved material response to Laguerre-Gaussian light, discovering new excited state response in bulk GaAs. Helped conceive of, design, and obtain funding (\$3 million) for the experiment.• Developed a time-domain vibrational technique based on 2D electronic spectroscopy, and used it to observe interexciton vibrational correlations directly in the Fenna-Matthews-Olson complex.• Developed a method to obtain highly resolved diagonal and cross peaks in 2D electronic spectra, revealing the detailed spectral features in congested spectra. | | |
| Argonne National Laboratory | Lemont, IL | 2010 - 2012 |
| Laboratory graduate research fellow, concurrent with Northwestern University | | |
| Northwestern University | Evanston, IL | 2007 - 2012 |
| Graduate research assistant
Advisor: Lin X. Chen | | |
| <ul style="list-style-type: none">• Studied intramolecular and intermolecular exciton dissociation in alternating copolymers, identifying trends between intramolecular polymer processes and corresponding bulk | | |

heterojunction device efficiencies.

- Examined aggregate morphologies in neat and bulk heterojunction alternating copolymer films using grazing incidence wide/small angle X-ray scattering, demonstrating correlations between π - π stacking distances and bulk heterojunction device fill factor.
- Studied spontaneous self-assembly behavior in spin-coated photovoltaic oligomer systems depending on monomer length, using grazing incidence wide/small angle X-ray scattering and atomic force microscopy.
- Characterized anisotropic absorption behavior of organic donor-acceptor cocrystals as a function of modular chromophore species.

GRANTS

1. “Transcribing Quantum Information using Quantum Dynamics of Coherent Materials” (PI: Engel)

10/1/2014 - 9/30/2019

Agency: Department of Defense National Security Science and Engineering Faculty Fellowship
Total costs: \$3,000,000 (all to U. Chicago, PI: Engel)

2. “Coherent Energy Transfer in Novel Excitonic Materials for Solar Energy Applications” (PI: Engel)

1/31/2016 - 1/30/2019

Agency: Qatar National Research Foundation
Total costs: \$3,000,000 (20% to U. Chicago, PI: Engel; 80% to QEERI, PI: Sabre Kais)
