### EDUCATION

**Northwestern University, Evanston, IL** **2007 – 2012**

Ph.D., Physical Chemistry

Dissertation: “Charge-Transfer Oligomers and Polymers for Organic Photovoltaics: Structure, dynamics, and their implications for solar devices”

**University of Washington, Seattle, WA** **2002 – 2007**

BS, Chemistry and BA, English (with honors)

### RESEARCH EXPERIENCE

**The University of Chicago, Chicago, IL** **2013 - present**

Postdoctoral fellow, Department of Chemistry and The James Franck Institute

PI: Greg S. Engel

- Developed a time-ordered, time-domain vibrational technique based on 2D electronic spectroscopy, and used it to observe interexcitonic vibrational correlations in a photosynthetic pigment-protein complex. These correlations can extend coherence lifetimes.
- Developed a method to obtain highly resolved 2D electronic spectra, revealing the overlapping peak positions of feature-rich spectra. This method is generally applicable.
- Built an experiment to measure the transient material response to Laguerre-Gaussian “twisted light,” and used it to measure how the response in semiconductors depends on the light’s orbital angular momentum. These dynamics can be understood and optimized to create solid-state detectors for this quantum number in light. Helped conceive of, design, and obtain funding (\$3 million, see Grants section) for the project.

**Northwestern University, Evanston, IL** **2007 – 2012**

and concurrently at **Argonne National Laboratory, Lemont, IL** **2010 – 2012**

Graduate researcher, Department of Chemistry and ANSER Center

PI: Lin X. Chen

- Studied intramolecular and intermolecular exciton dissociation in alternating copolymers, identifying trends between intramolecular polymer processes and corresponding bulk heterojunction device efficiencies. These studies explained high power conversion efficiencies in organic photovoltaic devices employing alternating copolymers.
- Examined aggregate morphologies in neat and bulk heterojunction alternating copolymer films using grazing incidence wide/small angle X-ray scattering, demonstrating correlations between  $\pi$ - $\pi$  stacking distances and bulk heterojunction device fill factor.

- Studied spontaneous self-assembly behavior in spin-coated photovoltaic oligomer systems depending on monomer length, using grazing incidence wide/small angle X-ray scattering and atomic force microscopy.
- Characterized anisotropic absorption behavior of organic donor-acceptor co-crystals as a function of modular chromophore species.

## GRANTS

### “Transcribing Quantum Information using Quantum Dynamics of Coherent Materials”

(PI: Engel)

10/1/2014 - 9/30/2019

Agency: Department of Defense National Security Science and Engineering Faculty Fellowship

Total costs: \$3,000,000 (all to U. Chicago, PI: Engel)

Contribution: Helped conceive of and design the project, and co-wrote the proposal.

## TALKS

9. **Rolczynski, B. S.** and Engel, G. S. “Correlated Motion for Prolonged Quantum Coherences in a Photosynthetic Protein.” Invited talk, Loyola University, Chicago, IL, 4/20/17.

8. **Rolczynski, B. S.**; Navotnaya, P.; Engel, G. S. “Driving delocalized dynamics using the orbital angular momentum of light.” ACS Meeting, San Francisco, CA, 4/5/17.

7. **Rolczynski, B. S.**; Yeh, S.; Navotnaya, P.; Ashraf, K.; Gardiner, A.; Cogdell, R.; Engel, G. S. “Resolving the detailed 2D spectral structure of the Fenna-Matthews-Olson complex.” ACS Meeting, San Francisco, CA. 4/5/17.

6. **Rolczynski, B. S.**; Zheng, H.; Singh, V.; Navotnaya, P.; Caram, J.; Ashraf, K.; Gardiner, A.; Cogdell, R.; Engel, G. S. “Correlated vibrational motion in the Fenna-Matthews-Olson complex.” ACS Meeting, San Francisco, CA. 4/2/17.

5. **Rolczynski, B. S.** and Engel, G. S. “Correlated exciton environments in the Fenna-Matthews-Olson complex.” Photosynthesis conference, Marshall, IN, 11/5/16.

4. **Rolczynski, B. S.** and Engel, G. S. “Transcribing light’s orbital angular momentum to materials.” Spinovs VI, Chicago, IL, 10/17/16.

3. **Rolczynski, B. S.** and Engel, G. S. “Long-lived coherences through correlated environments.”

ACS Meeting, Philadelphia, PA, 8/22/16.

2. **Rolczynski, B. S.** and Engel, G. S. "How Long Does a CdSe Quantum Dot Remember Its Excitation Energy?" Nanotalk Symposium, Chicago, IL, 2/25/14.

## TEACHING

### **The University of Chicago, Chicago, IL**

Guest lecture

Wave Mechanics and Spectroscopy

Fall 2015

Research mentor

Graduate Students: Polina Navotnaya, John Otto, Hallie Sussman, Curtis Peterson, Ryan  
Mensson

Undergraduates: Alan Ginzburg, Matthew Talaga, Jonathan Michelson

### **Northwestern University, Evanston, IL**

Research mentor

Graduate Students: Sam Eaton

Undergraduates: Julie Bloom

Super TA, General Physical Chemistry  
*by invitation only*

Spring 2008, Spring 2009

Instructor, Gateway Science Workshop  
*an honors Chemistry program for undergraduates*

Spring 2008, Spring 2009

TA, Advanced Undergraduate Laboratory

Summer 2009

TA, General Inorganic Chemistry

Winter 2008

TA, General Chemistry

Fall 2007

## SERVICE

Reviewer

ACS Energy Letters
